

Food & Beverage encoder

BEI IDEACOD is launching its new encoder range dedicated to the Food & Beverage Industry.

The company brings its famous encoder activity for special environments to a higher level in developing its Food & Beverage industry encoder range.

Applications

Control and transform without interruption all your processes: packaging, meat cutting, dosing, storing and conveying for fresh and cooked food.

Hygiene, Security and Traceability...

Incremental and Absolute Food & Beverage encoders have been created to run close to food where technical demands are stricter :

- **IP69K** design for maximum waterproofing.
- **"Long Life"** system for shock and vibration resistance
- **Hygienic design** prevents bacterial proliferation
- **316 Stainless steel** bio-compatible, frequent washing compatibility.

Support

BEI IDEACOD has developed an optimum level of services: customization and compatibility are our strengths.

Let's be business partners!
